**NOTICE:** NAR Headquarters is experiencing temporary technical difficulties with its Internet Service Provider. We're working to resolve the problem, but in the meantime, NAR HQ cannot access its mailbox. Mail is not being lost -- it is just temporarily inaccessible. Mail is still being received, and all outstanding mail and applications will be answered as promptly as possible. Thanks for your patience.

The National Association of Rocketry is the oldest and largest sport rocketry organization in the world. Since 1957, over 80,000 serious modelers have joined the NAR to take advantage of the

fun and excitement of organized rocketry!

## Local Clubs

Get together with rocket flyers in a NAR Section near you -- participate in building sessions, launches, and more! If you'd like to have a club closer to you, we'll even show you how to start a new one!

## Organized Launches

NAR members and Sections host hundreds of launches each year -- both sport launches and competitions -- from the local and regional levels to national events. Check out our Online Launch Windows calendar listing some of the launches coming up in the next few months, in the United States and worldwide.

In addition to hundreds of local launches, the NAR sponsors three major national events each year:

### NARAM

Our week-long competition meet  
NARAM-2000 (NARAM-42): July 29 - August 4 in Cañon City CO

### NSL

Our three-day National Sport Launch  
NSL 2000: May 27-29, 2000 in Geneseo NY

### NARCON

Our National Convention  
NARCON 2000: March 17-19, 2000 in Richardson TX

## Sport Rocketry Magazine

Sport Rocketry is a bi-monthly magazine jam-packed with building tips, plans, product reviews, technical information, space science features, interviews, and reports on launches and other rocketry activities from all over the country! In alternate months, NAR members also receive the *Model Rocketeer* newsletter, which contains official Association

notices and an up-to-the minute schedule of upcoming launches and activities!

## High-Power Certification

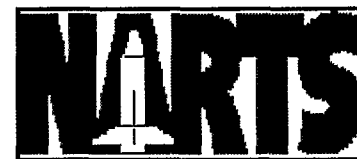

As an adult NAR member, you can become qualified to purchase and use rocket motors more powerful than those allowed to be sold to the general public!

## Conventions

Learn about the newest theories, techniques, and product introductions at regional and national NAR conventions!

## Technical Services

Make NAR Technical Services (NARTS) your personal source of rocket plans, scale data and photos, technical reports, manuals, books, flight and simulation software, logo membership items, and more!

## Join Today!

All these exciting activities and benefits can be yours...  
...as soon as you become a member of the National Association of Rocketry!
